VOLUME CONTENTS

January

S. Wroński and M. Jastrzębski	1	Mass transfer in the spiral flow of a pseudoplastic liquid
R. J. Goldstein, S. Y. Yoo and M. K. Chung	9	Convective mass transfer from a square cylinder and its base plate
P. Hatzikonstantinou	19	Unsteady mixed convection about a porous rotating sphere
S. Kourosh, M. E. Crawford and K. R. Diller	29	Microscopic study of coupled heat and mass transport during unidirectional solidification of binary solutions—I. Thermal analysis
S. Kourosh, K. R. Diller and M. E. Crawford	39	Microscopic study of coupled heat and mass transport during unidirectional solidification of binary solutions—II. Mass transfer analysis
P. G. Daniels and C. F. Ong	55	Linear stability of convection in a rigid channel uniformly heated from below
H. Abichandani and S. C. Sarma	61	Heat transfer in horizontal mechanically formed thin film heat exchangers—application of penetration theory model
J. T. Holland and J. A. Liburdy	69	Measurements of the thermal characteristics of heated offset jets
B. B. Rogers and L. S. Yao	79	The effect of mixed convection instability on heat transfer in a vertical annulus
W. Tong, A. Bar-Cohen, T. W. Simon and S. M. You	91	Contact angle effects on boiling incipience of highly-wetting liquids
S. M. You, T. W. Simon, A. Bar-Cohen and W. Tong	105	Experimental investigation of nucleate boiling incipience with a highly-wetting dielectric fluid (R-113)
M.-J. Huang and C.-K. Chen	119	Local similarity solutions of free convective heat transfer from a vertical plate to non-Newtonian power law fluids
Y. Cao and A. Faghri	127	Thermal protection from intense localized moving heat fluxes using phase-change materials
T. L. Bergman and B. W. Webb	139	Simulation of pure metal melting with buoyancy and surface tension forces in the liquid phase

M. R. Islam and K. Nandakumar 151 Transient convection in saturated porous layers with internal heat sources

A. P. Shapiro and S. Motakef 163 Unsteady heat and mass transfer with phase change in porous slabs: analytical solutions and experimental results

A. D. Polyanin and V. V. Dil'man 175 The method of the 'carry over' of integral transforms in non-linear mass and heat transfer problems

A. D. Polyanin and V. V. Dil'man 183 An algebraic method for heat and mass transfer problems

Technical Notes

J. C. Lim and J. Weisman 203 A phenomenologically based prediction of the critical heat flux in channels containing an unheated wall

A. Bejan 206 Optimum hair strand diameter for minimum free-convection heat transfer from a surface covered with hair

F. C. Lai and F. A. Kulacki 209 Coupled heat and mass transfer from a sphere buried in an infinite porous medium

C. Saltiel and M. H. N. Naraghi 215 Radiative configuration factors from cylinders to coaxial axisymmetric bodies

February

E. A. Orudzhaliyev 219 Theoretical investigation of the temperature regime and pressure distribution in a gas main

E. A. Orudzhaliyev 225 Some gas dynamic relations for real gas flows in the presence of heat transfer

G. F. Hewitt and A. H. Govan 229 Phenomenological modelling of non-equilibrium flows with phase change

M. Golombok, H. Jariwala and L. C. Shirvill 243 Gas–solid heat exchange in a fibrous metallic material measured by a heat regenerator technique

J. Schirrmann 253 Unsteady-state mass transfer by fluid particles of changing volume

W. W. Baumann and F. Thiele 267 Heat and mass transfer in evaporating two-component liquid film flow

M. A. Cotton and J. D. Jackson 275 Vertical tube air flows in the turbulent mixed convection regime calculated using a low-Reynolds-number $k \sim \epsilon$ model

T. F. Lin, C. C. Huang and T. S. Chang 287 Transient binary mixture natural convection in square enclosures

B. D. Shaw and F. A. Williams 301 Theory of influence of a low-volatility, soluble impurity on spherically-symmetric combustion of fuel droplets

L. Zhang, A. Soufiani, J. P. Petit and J. Taine 319 Coupled radiation and laminar mixed convection in an absorbing and emitting real gas mixture along a vertical plate

L. P. Chua and R. A. Antonia 331 Turbulent Prandtl number in a circular jet

J. B. Aparecido and R. M. Cotta 341 Thermally developing laminar flow inside rectangular ducts

S. Łopata 349 Détermination du flux de chaleur instationnaire sur les surfaces cylindriques

J. Ewen 359 Susceptibility to drying of unsaturated soil near warm impermeable surfaces

D. G. Neilson, F. P. Incropera and W. D. Bennon 367 Numerical simulation of solidification in a horizontal cylindrical annulus charged with an aqueous salt solution

M. Naimi, R. Devienne et M. Lebouche 381 Etude dynamique et thermique de l'écoulement de Couette–Taylor–Poiseuille; cas d'un fluide présentant un seuil d'écoulement

N. E. Kotsovinos 393 Dissipation of turbulent kinetic energy in buoyant free shear flows

March

D. L. R. Oliver and J. N. Chung 401 Unsteady conjugate heat transfer from a translating fluid sphere at moderate Reynolds numbers

F. A. Mohamed 409 The energy-integral method: application to one-phase hyperbolic Stefan problems

O. Miyatake and H. Iwashita 417 Laminar-flow heat transfer to a fluid flowing axially between cylinders with a uniform surface temperature

W.-Z. Cao and D. Poulikakos 427 Solidification of an alloy in a cavity cooled through its top surface

J. F. Lafortune and D. A. Meneley 435 Natural convection in a vertical cylinder: comparison of COMMIX-1A predictions with experiment

V. Vilimpoc, R. Cole and P. C. Sukanek 447 Heat transfer in Newtonian liquids around a circular cylinder

S. L. Lee and J. S. Tsai 457 Cooling of a continuous moving sheet of finite thickness in the presence of natural convection

M. L. Hall and J. M. Doster 465 A sensitivity study of the effects of evaporation/condensation accommodation coefficients on transient heat pipe modeling

P. Y. CHANG, W. SHYY and J. T. DAKIN — 483 A study of three-dimensional natural convection in high-pressure mercury lamps—I. Parametric variations with horizontal mounting

W. SHYY and P. Y. CHANG — 495 A study of three-dimensional natural convection in high-pressure mercury lamps—II. Wall temperature profiles and inclination angles

S. BHATTACHARJEE and W. L. GROSSHANDLER — 507 A simplified model for radiative source term in combusting flows

P. J. HEGGS, D. B. INGHAM and D. J. KEEN — 517 The effects of heat conduction in the wall on the development of recirculating combined convection flows in vertical tubes

W. M. YAN and T. F. LIN — 529 Combined heat and mass transfer in natural convection between vertical parallel plates with film evaporation

A. VALLEJO and C. TREVIÑO — 543 Convective cooling of a thin flat plate in laminar and turbulent flows

J. R. MAUGHAN and F. P. INCROPERA — 555 Regions of heat transfer enhancement for laminar mixed convection in a parallel plate channel

Technical Notes

M. A. HOSSAIN and M. AHMED — 571 MHD forced and free convection boundary layer flow near the leading edge

F. C. LAI and F. A. KULACKI — 576 The influence of surface mass flux on mixed convection over horizontal plates in saturated porous media

N. SELÇUK — 579 Evaluation of spherical harmonics approximation for radiative transfer in cylindrical furnaces

April

M. M. OHADI, E. M. SPARROW, A. WALAVALKAR and A. I. ANSARI — 583 Pressure drop characteristics for turbulent flow in a straight circular tube situated downstream of a bend

S. C. GUPTA — 593 Numerical and analytical solutions of one-dimensional freezing of dilute binary alloys with coupled heat and mass transfer

R. AKIYOSHI, S. NISHIO and I. TANASAWA — 603 A study on the effect of non-condensible gas in the vapor film on vapor explosion

Y. KATTO — 611 A physical approach to critical heat flux of subcooled flow boiling in round tubes

H.-T. CHEN and S.-M. CHANG — 621 Application of the hybrid method to inverse heat conduction problems

K. FUKUDA, Y. MIKI and S. HASEGAWA — 629 Analytical and experimental study on turbulent natural convection in a horizontal annulus

S. I. Baranovsky, V. M. Levin, A. S. Nadvorsky and A. I. Turishchev — 641 — Heat transfer in supersonic coaxial reacting jets

Y. Utaka, A. Saito and H. Yanagida — 649 — An experimental investigation of the reversibility and hysteresis of the condensation curves

Z. Zhang and A. Bejan — 661 — Solidification in the presence of high Rayleigh number convection in an enclosure cooled from the side

D. A. Pruzan, K. E. Torrance and C. T. Avedisian — 673 — Two-phase flow and dryout in a screen wick saturated with a fluid mixture

J. Sucec and D. Radley — 683 — Unsteady forced convection heat transfer in a channel

A. Adeniji-Fashola and C. P. Chen — 691 — Modeling of confined turbulent fluid–particle flows using Eulerian and Lagrangian schemes

M. P. Henry and A. J. Willmott — 703 — A declarative language for the thermal design of regenerative heat exchangers

J. R. Wolf, J. W. C. Tseng and W. Strieder — 725 — Radiation conductivity for a random void–solid medium with diffusely reflecting surfaces

H. Klein, S. A. Klein and J. W. Mitchell — 735 — Analysis of regenerative enthalpy exchangers

S. L. Braga and R. Viskanta — 745 — Solidification of a binary solution on a cold isothermal surface

A. M. Jacobi and V. W. Goldschmidt — 755 — Low Reynolds number heat and mass transfer measurements of an overall counterflow, baffled, finned-tube, condensing heat exchanger

R. Mathes, J. Blumenberg and K. Keller — 767 — Radiative heat transfer in insulations with random fibre orientation

May

V. K. Pustovalov and I. A. Khorunzhii — 771 — Thermal processes during the interaction of optical radiation pulses with heterogeneous laminated biotissues

C. Bénard, Y. Body, M. Delisée, C. Depoid et D. Gobin — 785 — Identification de l'erreur de mesure par thermocouple de la température d'une surface soumise a différentes conditions d'échanges

C. P. Grigoropoulos, A. F. Emery and E. P. Wipf — 797 — Heat transfer in thin silicon film melting by laser line sources

D. V. Walters and R. O. Buckius — 805 — On the characteristic lengths for absorbing, emitting, and scattering media

Xi Chen	815	Heat transfer and flow in a radio frequency plasma torch—a new modelling approach
B.-X. Wang and X. Zhang	827	Natural convection in liquid-saturated porous media between concentric inclined cylinders
T. Nishimura, S. Murakami, S. Arakawa and Y. Kawamura	835	Flow observations and mass transfer characteristics in symmetrical wavy-walled channels at moderate Reynolds numbers for steady flow
H. Yoshida, J. H. Yun, R. Echigo and T. Tomimura	847	Transient characteristics of combined conduction, convection and radiation heat transfer in porous media
H. Yoshida, K. Suenaga and R. Echigo	859	Turbulence structure and heat transfer of a two-dimensional impinging jet with gas–solid suspensions
J. Lee, M. T. Hyun and Y. S. Kang	869	Confined natural convection due to lateral heating in a stably stratified solution
D. Y. Tzou	877	Thermal shock waves induced by a moving crack—a heat flux formulation
S. Chellaiah and R. Viskanta	887	Natural convection melting of a frozen porous medium
W. W. Yuen and E. E. Takara	901	Superposition technique for radiative equilibrium in rectangular enclosures with complex boundary conditions
E. Ramos, A. Castrejón and M. Gordon	917	Natural convection in a two-dimensional square loop
S. Acharya and R. Jetli	931	Heat transfer due to buoyancy in a partially divided square box
T. H. Hwang	943	Convective heat transfer to laminar droplet flow in tube bundles
L. Robillard and K. E. Torrance	953	Convective heat transfer inhibition in an annular porous layer rotating at weak angular velocity
S. H. Bhavnani and A. E. Bergles	965	Effect of surface geometry and orientation on laminar natural convection heat transfer from a vertical flat plate with transverse roughness elements
M. Fatehi and M. Kaviany	983	Analysis of levitation of saturated liquid droplets on permeable surfaces
C. C. Lakshmanan and O. E. Potter	995	Dynamic simulation of plate heat exchangers
R. P. Gakkhar and S. Prakash	1003	Unsteady vaporization of fuel droplets in a convective environment with varying ambient conditions

S. H. KIM, N. K. ANAND and W. AUNG — 1013 Effect of wall conduction on free convection between asymmetrically heated vertical plates: uniform wall heat flux

Technical Notes

N. K. ANAND, S. H. KIM and W. AUNG — 1025 Effect of wall conduction on free convection between asymmetrically heated vertical plates: uniform wall temperature

F. C. LAI and F. A. KULACKI — 1028 The effect of variable viscosity on convective heat transfer along a vertical surface in a saturated porous medium

C. Y. WU and J. Y. CHIANG — 1032 Linearly anisotropic scattering in a rectangular medium exposed to collimated radiation

R. KRISHNAMURTHY — 1034 A linear stability analysis of a mixed convection plume

Book Reviews

N. C. MARKATOS — 1039 Transport Processes in Chemically Reacting Flow Systems, by O. E. ROSNER

N. C. MARKATOS — 1039 Heat Transfer, by JAMES SUCEC

N. C. MARKATOS — 1040 Heat Transfer Equipment Design, edited by R. K. SHAH, E. C. SUBBARAO and R. A. MASHELKAR

W. B. HALL — 1041 Archives of Heat Transfer, edited by NAIM AFGHAN

Announcement

1043 EUROTHERM Seminar No. 18 on "Design and Operation of Heat Exchangers", Hamburg, Federal Republic of Germany, 27 February–1 March 1991

June

J. R. RIZNIĆ — 1045 Professor Naim H. Afgan on his 60th birthday

A. I. LEONTIEV, B. B. PETRIKEVICH and O. G. VYRODOV — 1047 Turbulent gas flow heat transfer and friction in channels of different cross-sections

A. D. POLYANIN and V. V. DIL'MAN — 1057 The method of asymptotic analogies in the mass and heat transfer theory and chemical engineering science

P. R. PATIL, C. P. PARVATHY and K. S. VENKATAKRISHNAN — 1073 Effect of rotation on the stability of a doubly diffusive fluid layer in a porous medium

T. M. ATANACKOVIĆ and DJ. S. DJUKIĆ — 1081 An extremum variational principle for some nonlinear diffusion problems

R. A. W. M. HENKES and C. J. HOOGENDOORN — 1087 Numerical determination of wall functions for the turbulent natural convection boundary layer

M. O. ISIKAN — 1099 Condensation of spherical-cap shaped bubbles

J. PRAŽÁK, J. TYWONIAK, F. PETERKA and T. ŠLONC — 1105 Description of transport of liquid in porous media—a study based on neutron radiography data

S. A. M. Said and R. J. Krane	1121	An analytical and experimental investigation of natural convection heat transfer in vertical channels with a single obstruction
S. K. Roy and S. Sengupta	1135	Gravity-assisted melting in a spherical enclosure: effects of natural convection
B. Basu and A. W. Date	1149	Numerical study of steady state and transient laser melting problems—I. Characteristics of flow field and heat transfer
B. Basu and A. W. Date	1165	Numerical study of steady state and transient laser melting problems—II. Effect of the process parameters
B. Banerjee, K. V. Chalapathi Rao and V. M. K. Sastri	1177	Transient free convective heat transfer from co-rotating concentric disks
G. Le Palec, P. Nardin and D. Rondot	1183	Study of laminar heat transfer over a sinusoidal-shaped rotating disk
A. Palacio, M. R. Malin, N. Proumen and L. Sanchez	1193	Numerical computations of steady transonic and supersonic flow fields
C. Doughty and K. Pruess	1205	A similarity solution for two-phase fluid and heat flow near high-level nuclear waste packages emplaced in porous media
T. Aihara, S. Maruyama and S. Kobayakawa	1223	Free convective/radiative heat transfer from pin-fin arrays with a vertical base plate (general representation of heat transfer performance)
H. V. Mahaney, F. P. Incropera and S. Ramadhyani	1233	Comparison of predicted and measured mixed convection heat transfer from an array of discrete sources in a horizontal rectangular channel
M. Sözen and K. Vafai	1247	Analysis of the non-thermal equilibrium condensing flow of a gas through a packed bed
H. C. Tien and K. Vafai	1263	A synthesis of infiltration effects on an insulation matrix
H. Choi and A. F. Mills	1281	Heat and mass transfer in metal hydride beds for heat pump applications
M. S. El-Genk, S. D. Bedrose and D. V. Rao	1289	Forced and combined convection of water in a vertical seven-rod bundle with $P/D = 1.38$
H.-M. Chang and J. L. Smith, Jr.	1299	Mass transfer of supersaturated contaminants in cryogenic helium heat exchangers
M. M. Rahman and V. P. Carey	1307	Experimental measurements of orthogonal mixed convection in a partial enclosure

P. Anderson and D. Glasser 1321 Thermal convection and surface temperatures in porous media

S. B. Sathe, R. E. Peck and T. W. Tong 1331 A numerical analysis of heat transfer and combustion in porous radiant burners

T. W. Tong, S. B. Sathe and R. E. Peck 1339 Improving the performance of porous radiant burners through use of sub-micron size fibers

B. H. Kang and Y. Jaluria 1347 Natural convection heat transfer characteristics of a protruding thermal source located on horizontal and vertical surfaces

Technical Notes

M. M. Ohadi and E. M. Sparrow 1359 Effect of a 180° bend on heat transfer in a downstream positioned straight tube

C. Deslouis, O. Gil and V. Sobolik 1363 Electrodiffusional probe for measurement of the wall shear rate vector

Y. Cao and A. Faghri 1367 Heat transfer in liquid metals by natural convection

K. J. Renken and D. Poulikakos 1370 Mixed convection experiments about a horizontal isothermal surface embedded in a water-saturated packed bed of spheres

July

A. D. Polyanin 1375 Three-dimensional problems of unsteady diffusion boundary layer

D.-Y. Shang and B.-X. Wang 1387 Effect of variable thermophysical properties on laminar free convection of gas

A. G. Kirdyashkin and V. E. Distanov 1397 Hydrodynamics and heat transfer in a vertical cylinder exposed to periodically varying centrifugal forces (accelerated crucible-rotation technique)

M. T. Ouazzani, J. K. Platten et A. Mojtabi 1417 Etude expérimentale de la convection mixte entre deux plans horizontaux à températures différentes—II

Y. G. Lai and R. M. C. So 1429 Near-wall modeling of turbulent heat fluxes

J. G. Petri and T. L. Bergman 1441 Augmentation of natural convection heat transfer using binary gas coolants

G. Berthoud and S. Jayanti 1451 Characterization of dryout in helical coils

A. C. Bannwart and A. Bontemps 1465 Condensation of a vapour with incondensables: an improved gas phase film model accounting for the effect of mass transfer on film thickness

M. A. Goldshtik and V. N. Shtern 1475 Free convection near a thermal quadrupole

I. M. Rustum and H. M. Soliman 1485 Numerical analysis of laminar mixed convection in horizontal internally finned tubes

E. Leveroni and E. Pfender 1497 A unified approach to plasma–particle heat transfer under non-continuum and non-equilibrium conditions

S. H. Park and C. L. Tien 1511 Radiation induced ignition of solid fuels

A. B. McEntire and B. W. Webb 1521 Local forced convective heat transfer from protruding and flush-mounted two-dimensional discrete heat sources

K. Mizukami and K. Futagami 1535 Confluent hypergeometric solutions of heat conduction equation

W. Marquardt and H. Auracher 1545 An observer-based solution of inverse heat conduction problems

Technical Notes

J. Gembarovič, L. Vozár and V. Majerník 1563 Using the least square method for data reduction in the flash method

C.-C. Li and Y.-C. Lee 1566 A statistical procedure for model building in dimensional analysis

P. S. Lykoudis 1568 Non-dimensional numbers as ratios of characteristic times

Book Reviews

S. Richardson 1571 Transport Phenomena in Polymeric Systems, edited by R. A. Mashelkar, A. S. Mujumdar and R. Kamal

K. A. Pericleous 1571 Fluidized Bed Technology–Principles and Applications, by J. R. Howard

Announcement

1573 International Symposium on Instabilities in Multiphase Flows, Rouen, France, 11–14 May 1992

August

I. Tanasawa and R. Echigo 1575 Heat transfer bibliography—Japanese works

C. T. Hsu and P. Cheng 1587 Thermal dispersion in a porous medium

A. F. Lisovsky 1599 The migration of metal melts in sintered composite materials
